Why Can't We Conceive? Infertility Assessment

Effortless Imaging

Exceptional imaging is essential when investigating causes of infertility and Voluson Core Architecture enables exceptional imaging in any mode.

Normal Uterus

Power Doppler Endometrioma Ovary

3D Simplified

Adding 3D to your practice can provide additional information in the assessment of infertility and now it is simple with Voluson SWIFT.

Find the sagittal view and Uterine Trace provides the coronal plane in 3 easy steps

Assessment of an ovarian mass is simplified using Tomographic Ultrasound Imaging (TUI) to view multiple slices

Sonohysterogram demonstrating enhanced depth and clarity using HDlive™ advanced illuminating and shadowing techniques

SonoAVC™ *antral*^{2.0} Sonography-based Automated Volume Count automates ovarian reserve assessment identifying and counting antral follicles

Improving Efficiency in Follicle Monitoring

Follicle monitoring is one of the most critical aspects of fertility management and can be the most time consuming. Adding SonoAVC*follicle* Sonography-based Automated Volume Count can enhance efficiency by automatically counting the number of follicles and calculating the volume and dimensions.

Stimulated Ovary

SonoAVC*follicle*

Safe, Confident Oocyte Retrieval and Embryo Transfer

Voluson SWIFT delivers in every way during procedures

- Clear visualization during oocyte retrieval and embryo transfer
- Optimized user and patient comfort with the new ICB9-RS bent endocavity transducer
- Full Screen Mode for even easier visualization
- Simplified design to aid in cleaning and disinfection

Oocyte Retrieval

Confirming a Dream

Identify an early pregnancy with ease. With exceptional imaging easily demonstrate fetal heart activity to parents. As the pregnancy progresses adding 3D can add a more realistic view.

Fetal Pole and Yolk Sac – 6-week Gestation

HDlive 11-week Fetus
